USER JOURNEY DOCUMENT

KG Review

A step-by-step visual reference covering the KG Reviewer's responsibilities — receiving cases cleared by both Welfare Review and ZI Approval, conducting a senior-level independent evaluation, and forwarding approved cases to Operations Lead.

KG Reviewer

The KG Reviewer is the third independent evaluator in the FACTS approval chain. By the time a case reaches KG Review, it has already been cleared by the Welfare Reviewer and the Zone Inspector (ZI). The KG Reviewer conducts a senior-level final check on the counseling form, attachments, and all prior reviewer comments before either approving the case to advance to Operations Lead, sending it back for rework, or rejecting it outright.

Table of Contents

KG REVIEWER

The KG Reviewer receives cases that have already been cleared by both the Welfare Reviewer and the Zone Inspector (ZI). By this stage, two independent evaluators have verified the case. The KG Reviewer conducts a senior-level review — cross-checking the Counseling Form, attachments, and all prior reviewer comments — before making one of three decisions: **Approve** (forward to Operations Lead), **Request Rework** (return to DCM with comments), or **Reject** (close the case with documented reasons). This document covers **9 steps** across the full KG Reviewer workflow.

07 Adding KG Review Comments ..... P 7

08 Making the Decision — Approve, Rework, or Reject ..... P 8

09 What Happens After the KG Decision ..... P 9

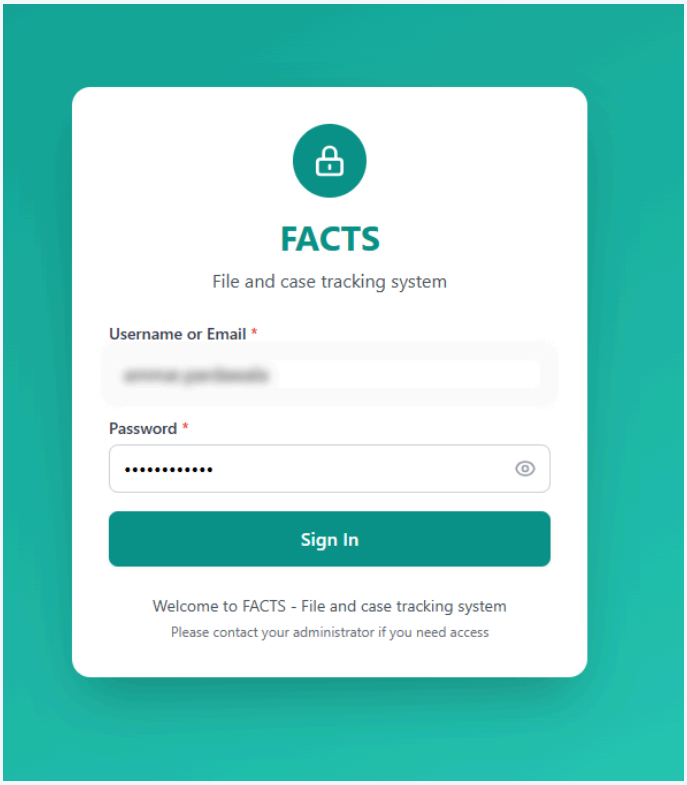
SECTION A — LOGIN & DASHBOARD

01

Login & Landing on the KG Reviewer Dashboard

The KG Reviewer accesses FACTS through the browser using their assigned credentials. After login, the system loads the KG Reviewer dashboard — a focused view showing all cases currently at the **KG Review** stage within the KG Reviewer's scope.

- Open browser → navigate to the FACTS URL → enter **Email** and **Password** → click **Login**
- On successful login, the **KG Reviewer Dashboard** loads showing key metrics for the reviewer's scope
- **Dashboard stat cards:** Cases Awaiting KG Review, Cases Approved This Month, Cases Sent for Rework, Cases Rejected
- A **Recent Cases** list at the bottom shows the most recently updated cases — sorted by SLA urgency by default
- Left sidebar shows the available modules: **Dashboard** and **Cases**
- The bell icon in the top bar shows unread notifications — cases approved by the ZI trigger automatic notifications to the KG Reviewer
- The KG Reviewer's name, role label (**KG Reviewer**), and scope are shown in the top-right profile area

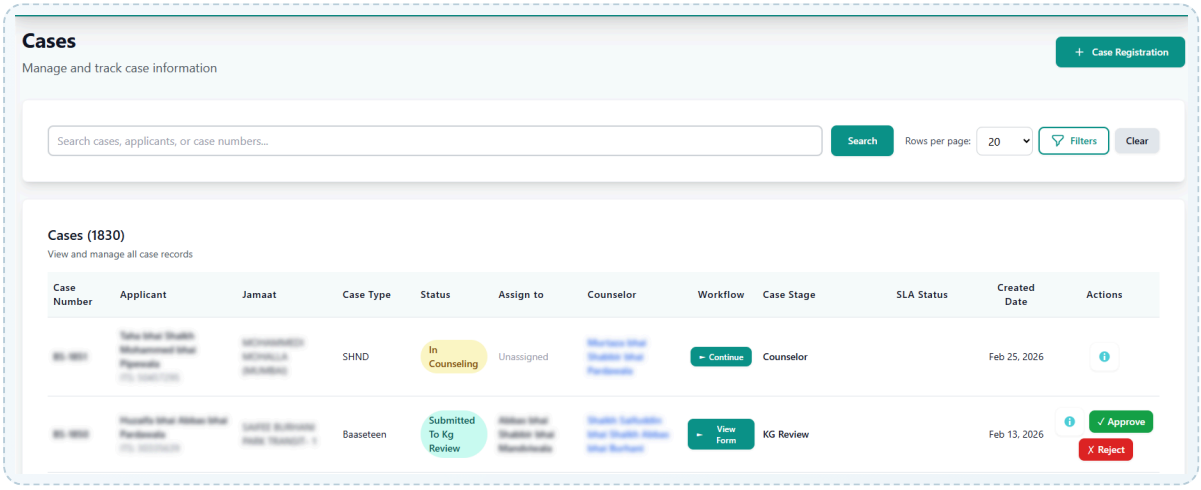


02 Navigating the Cases Module — Finding Cases to Review

All cases awaiting KG Review are visible in the **Cases** module. The KG Reviewer filters to see only cases at the **KG Review** stage and opens them one by one. Every case in this queue has already been cleared by both the Welfare Reviewer and the ZI.

- Click **Cases** in the left sidebar → the cases list loads scoped to the KG Reviewer's scope
- **Filter by Status → "KG Review"** to see only cases awaiting the KG Reviewer's action — this is the default filter on load for the KG Reviewer role
- Each case row shows: **Case Number** (BS-XXXX / SHND-XXXX), Applicant Name, Case Type, SLA badge, Assigned DCM, Welfare Reviewer name, ZI name, and Date Reached KG Review
- **SLA badge colours:** `On Track` `Due Soon` `Breached` — cases approaching or past SLA are highlighted prominently
- Cases can be sorted by SLA urgency (oldest first) to manage the review queue
- Click any case row → opens the **Case Detail View**

CONTEXT Every case in the KG Review queue has passed both Welfare Review and ZI Approval. Two independent reviewers have already evaluated the case and found it credible. The KG Reviewer is the third — and final — field-level evaluator before the case moves to Operations Lead.



SECTION B — REVIEWING THE CASE

03

Case Detail View — Header, Workflow Position & Tabs

Clicking a case opens the Case Detail View. The page shows a case summary header with the current workflow stage, a progress bar showing completed stages, and a tab strip. The KG Reviewer uses the **Counseling Form**, **Attachments**, **Comments**, and **Status History** tabs.

Case Header Information

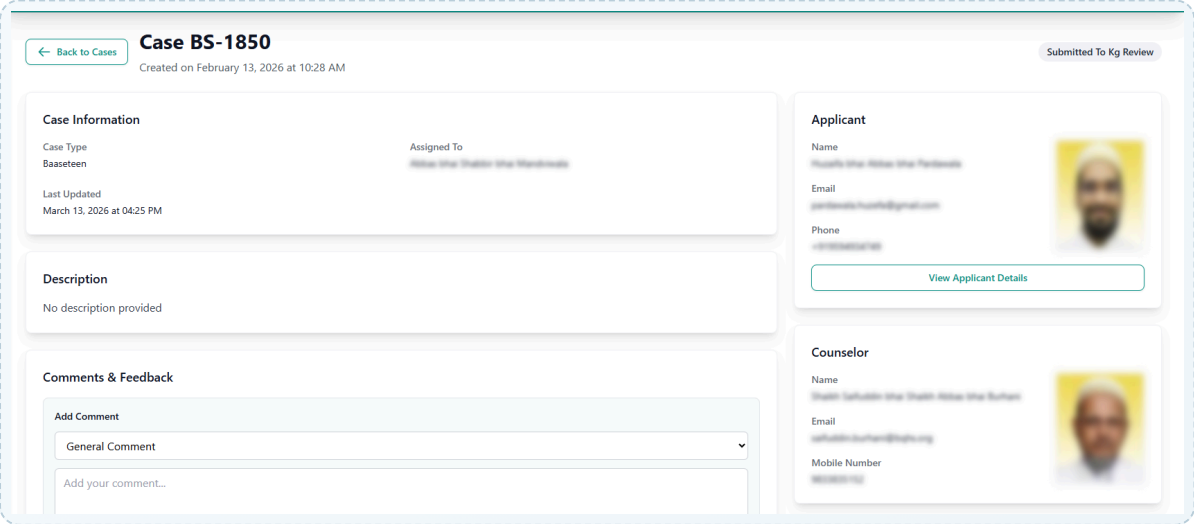
- **Case Number**, Applicant Name, Case Type badge, and current **Workflow Stage: KG Review** badge shown prominently at the top
- **SLA Timer** shows the KG-stage deadline — days remaining or days overdue for this review to be completed
- Assigned DCM, Welfare Reviewer name, and ZI name are all visible in the case header
- **Workflow Progress Bar** shows all stages — Welfare Review ✓ and ZI Approval ✓ are both marked as complete; **KG Review** is the active stage

Tabs Available to the KG Reviewer

Tab	Purpose	KG Access
Counseling Form	All 7 sections filled by the DCM — full read-only view	Read Only
Attachments	All uploaded supporting documents	View & Download
Comments	Full thread — includes Welfare Reviewer and ZI review notes	Read & Write
Status History	Full audit trail — all stage transitions with timestamps	Read Only
Cover Letter	Not yet generated — available after Operations Lead approval	Not Available

Recommended Review Order for KG Reviewer

Open Case › Status History & Comments › Read Full Form › Check Attachments › Add KG Comment › Make Decision



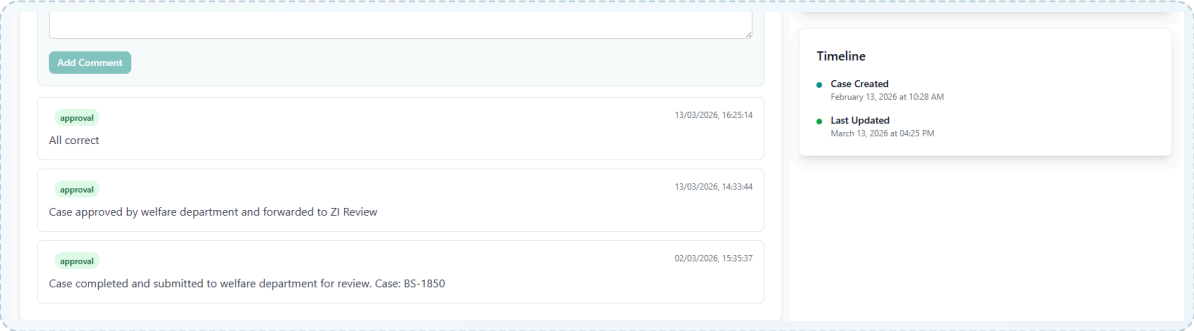
THE KG REVIEWER FORMS AN INDEPENDENT VIEW

Although two reviewers have already approved the case, the KG Reviewer must conduct their own independent evaluation. They are not simply ratifying previous decisions — they are the last line of senior field-level scrutiny before the case reaches Operations Lead and the cover letter generation stage.

04 Understanding the Case — Status History & Prior Reviewer Findings

Before opening the Counseling Form, the KG Reviewer reads the **Status History** and **Comments** tabs to understand the complete history of the case, including findings and rationale documented by the Welfare Reviewer and ZI.

- Click **Status History** → review the full audit trail: case creation, counseling form submission, Welfare Review approval, ZI approval, and the date the case reached KG Review
- If there were any prior **Rework cycles**, these are visible in the Status History — understand what issues were raised at each stage and how the DCM addressed them
- Click **Comments** → read all comments posted to date, including the **Welfare Reviewer's approval note** and the **ZI's approval comment**
- Pay close attention to any reservations or caveats either reviewer mentioned — even if they still approved, flagged concerns are relevant for the KG Reviewer's own assessment
- Note any DCM comments that provide context beyond what is in the form itself
- If both prior reviewers gave strong, well-reasoned approvals with no caveats, this is a positive signal — but does not replace the KG Reviewer's own judgment



05 Reading the Counseling Form — All 7 Sections

Click the **Counseling Form** tab to review the full form. The KG Reviewer focuses on the overall integrity and coherence of the case — verifying that figures are internally consistent and that the business case and financial projections hold up at a senior level of scrutiny.

KG Reviewer Focus Areas Per Section

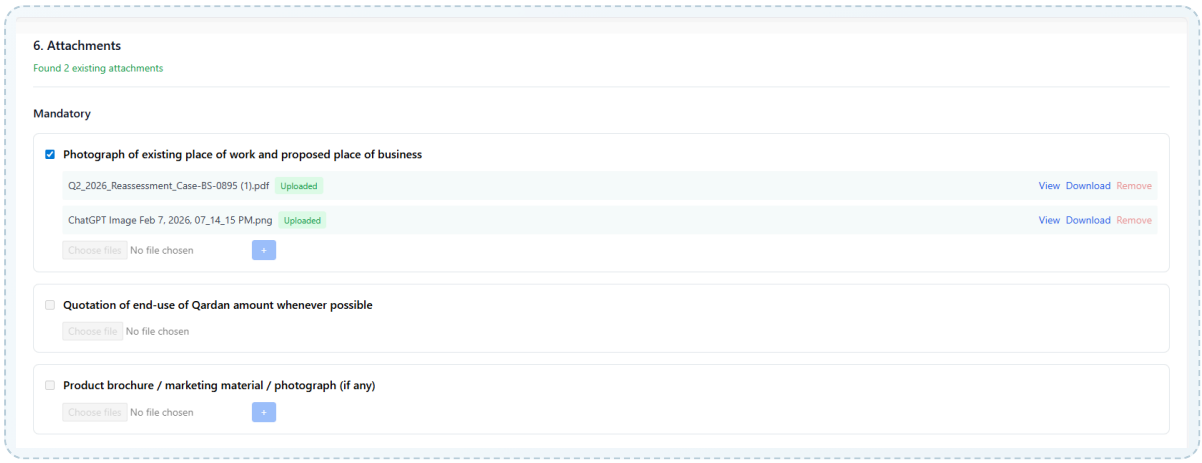
Section	KG Reviewer Focus
Section 1 — Personal Details	Identity and Jamaat details confirmed; applicant's eligibility for Baaseteen / SHND within the KG's scope
Section 2 — Family Details	Overall financial picture coherence — income, expenses, surplus/deficit, and declared assets all consistent with the assistance being requested
Section 3 — Business Assessment	Counselor's objectivity and depth of assessment; business viability beyond surface-level description; track record or credibility of the proposed venture
Section 4 — Financial Assistance	Total assistance quantum appropriateness; Enayat (grant) vs. Qardan (loan) split is justifiable; repayment terms realistic given Section 2 surplus
Section 5 — Economic Projections	Year-by-year projection credibility; growth assumptions are grounded in the business context described in Section 3; Cash Surplus from Year 1 sufficient for Qardan repayment schedule
Section 6 — Action Plan & Mentors	Action plan is specific, time-bound, and grounded in reality; mentor names are appropriate and qualified for the business type
Section 7 — Declaration	All three signatures (Applicant, Counselor, TR Committee) present with valid and sequential dates

06

Checking Attachments & Supporting Documents

Click the **Attachments** tab to verify all uploaded documents. The KG Reviewer confirms that mandatory documents are present and consistent with the case data, and takes note of any optional documents that strengthen or raise questions about the case.

- **Mandatory:** Business photograph, Quotation for Qardan end-use, Product brochure — all three must be present with a credible `Uploaded` status
- Verify the **Quotation amount** matches the Qardan figure in Section 4 — discrepancies at this stage after two prior reviews are a serious concern
- For **optional documents** (ITR, Financial Statements, Cancelled Cheque, PAN/Aadhar) — if present, cross-check declared income and asset figures against Section 2 data
- The KG Reviewer has **read-only access** — cannot upload or remove documents. Any attachment issues must be raised in Comments and resolved via Rework



07

Adding KG Review Comments

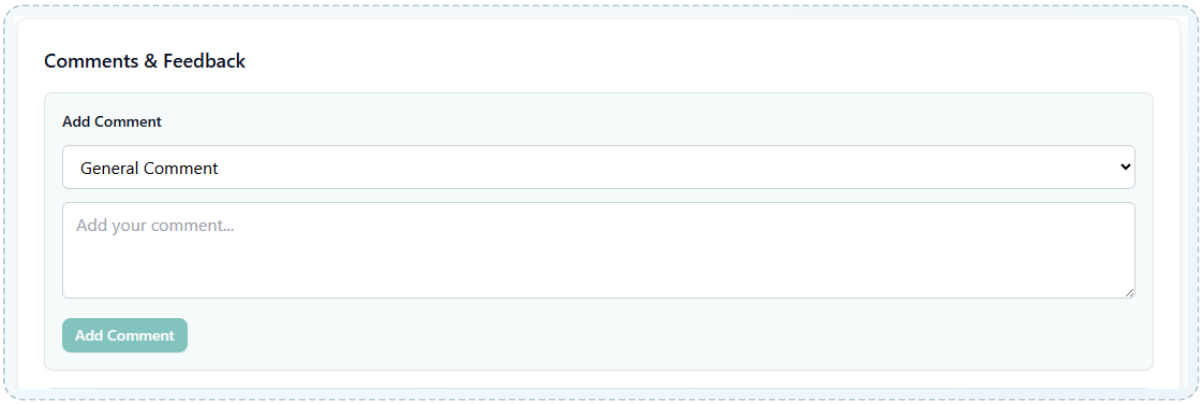
Before submitting a decision, the KG Reviewer documents their findings in the **Comments** tab. This comment is particularly significant — it is the last field-level review comment before the case advances to Operations Lead and eventually to the Executive Approval chain. It carries senior-level weight in the audit trail.

How to Add a Comment

- Click the **Comments** tab → scroll through the full thread to read all prior notes — DCM, Welfare Reviewer, and ZI comments are all visible
- Scroll to the bottom → type in the **comment text area** → click **Post Comment**
- The comment is attributed to the KG Reviewer's name and role with a timestamp automatically
- Multiple comments can be posted — the KG Reviewer can separate observations by topic if needed
- Comments are permanent and visible to all downstream reviewers including Operations Lead and Executive Approval

What the KG Reviewer Should Write — by Decision Type

Decision	Recommended Comment Content
Approving	Confirm the KG Reviewer's independent evaluation and key conclusions. E.g., "Reviewed the full case including Counseling Form (all 7 sections), attachments, and prior reviewer comments. Financial picture is internally consistent. Business viability is credible given the applicant's background and declared assets. Enayat/Qardan split is appropriate. Economic projections are reasonable. Recommending for Operations Lead review."
Rework	List specific numbered items. E.g., "Despite prior reviewer approvals, the following require correction before this case can proceed: 1. Section 5 Cash Surplus from Year 1 (₹3,200/month) is insufficient to service the proposed Qardan repayment (₹4,500/month). The projection or the Qardan amount must be revised. 2. Mentor in Section 6 is listed without any contact details or qualification notes. Please update."
Rejecting	State the grounds clearly and specifically. E.g., "On senior review, the declared business gross revenue of ₹8,000/month is inconsistent with the applicant's claimed business experience of 5 years in the same field (Section 3). Additionally, the ITR filed shows income of ₹4.2L p.a., which does not align with the declared monthly income of ₹18,000. The discrepancies are material and the case does not merit further processing."



KG COMMENT IS READ BY OPERATIONS LEAD & EXECUTIVE APPROVERS

The KG Reviewer's comment is the most senior field-level note in the case. Operations Lead and Executive Approvers read this comment to quickly understand the quality and basis of the case. A thorough, well-reasoned KG approval comment significantly speeds up downstream processing.

REWORK & REJECTION REQUIRE A COMMENT FIRST

The system requires at least one comment to be posted before allowing a Rework or Rejection action. For a KG-level Rework, issues must be specific and documented — prior reviewer approvals must be acknowledged in the comment when overriding them with a Rework request.

08

Making the Decision — Approve, Rework, or Reject

After reviewing all case materials and posting a comment, the KG Reviewer takes a formal action using the workflow action buttons on the Case Detail page. There are three possible decisions available to the KG Reviewer.

The Three Decision Options

APPROVE

The case has passed the KG Reviewer's senior-level evaluation. Clicking **Approve** moves the case to the **Operations Lead** stage. The Operations Lead is notified automatically. The KG approval is the final field-level clearance before the cover letter generation process begins.

REQUEST REWORK

The case has fixable issues not resolved in earlier reviews. Clicking **Request Rework** sends the case back to the DCM with status **Rework Required**. After corrections and resubmission, the case re-enters the review chain from **Welfare Review** before working its way back up to KG Review.

REJECT

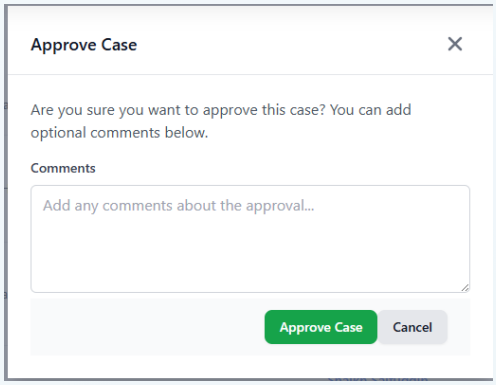
The case does not meet criteria and should not proceed further. Clicking **Reject** closes the case permanently. The DCM and all assigned stakeholders are notified. The KG Reviewer's rejection comment becomes the official rejection reason on the case record.

CONFIRMATION DIALOG

All three actions require confirmation before executing. A modal appears summarising the outcome — click
CONFIRM
to proceed or
CANCEL
to return to the case and review further before deciding.

Step-by-Step: Submitting the Decision

- Confirm a comment has been posted documenting the KG Reviewer's findings
- Click the appropriate action button — **Approve**, **Request Rework**, or **Reject** — in the workflow action panel on the case detail page
- Read the **confirmation dialog** carefully → click **Confirm** to execute the action
- The system updates the case status, sends notifications to the next relevant party, and logs the KG Reviewer's action in Status History with a timestamp
- The case is removed from the KG Reviewer's active queue and the Cases list is refreshed



KG Decision — Outcome Summary

Decision	Case Status After	Who Is Notified	Next Step
Approve	Operations Lead	Operations Lead	Operations Lead reviews; if approved, Cover Letter is generated
Request Rework	Rework Required	DCM	DCM corrects → resubmits → Welfare Review → ZI → KG again
Reject	Rejected / Closed	DCM + Stakeholders	Case closed; KG rejection reason permanently recorded

REWORK ROUTES BACK THROUGH THE FULL REVIEW CHAIN

When the KG Reviewer sends a case for Rework, the resubmitted case re-enters the chain at **WELFARE REVIEW** — not directly back to KG. The case must clear Welfare Review and ZI Approval again before returning to the KG Reviewer. This ensures every resubmission is re-verified independently at each level.

09

What Happens After the KG Decision

Once the KG Reviewer submits their decision, FACTS automatically routes the case to the correct next stage and notifies all relevant parties. The KG Reviewer's active role in this case is now complete unless it returns following a rework cycle.

After Approval — Case Moves to Operations Lead

- The case workflow advances to **Operations Lead** — the next stage in the approval chain
- The **Operations Lead** receives an in-app notification to review the case
- If the Operations Lead approves, the system triggers **Cover Letter Generation** — the auto-generated case summary document that will be used throughout the Executive Approval chain
- The KG Reviewer can still view the case and its downstream progress through the Cases module, but has no further actions to take

Full Workflow — KG's Position in the Complete Chain

Case ID & Draft › Counseling Form › Welfare Review ✓ › ZI Approval ✓ › **KG Review ✓** › **Operations Lead** › Cover Letter Generation › Executive Approval › Manzoori (Sanction) › Financial Disbursement › Payment Tracking › Fund Utilization › Case Closure

After Rework Request — What the KG Reviewer Should Expect

- The case status changes to **Rework Required** — the DCM is notified to make corrections to the Counseling Form
- After the DCM resubmits, the case re-enters the review chain at **Welfare Review** — it must pass both Welfare Review and ZI Approval before returning to KG Review
- The KG Reviewer is notified when the case arrives back at **KG Review** after clearing the earlier stages
- On re-review, check the Comments thread for the DCM's response and confirm that every item raised in the rework request has been addressed before approving

After Rejection — Case is Closed

- The case status changes to **Rejected** — the case is permanently closed; no further workflow actions are possible
- The KG Reviewer's rejection comment is stored on the case record as the official rejection reason
- The DCM and applicant are notified; the DCM can view the case and comments for reference and record-keeping
- A rejected case can only be re-opened by an Admin or Super Admin if a formally justified basis for reconsideration is provided

AWAITING REVIEW	APPROVED	REWORK SENT	REJECTED
Queue	**Forwarded**	**Returned**	**Closed**
Cases needing KG action	Sent to Operations Lead	Full chain re-review	Documented & closed

End of KG Reviewer User Journey

9 steps covering the complete KG Reviewer workflow in FACTS — from login and finding cases at the KG Review stage, through reading prior reviewer findings, the Counseling Form, and Attachments, to posting a senior review comment and making the final Approve, Rework, or Reject decision that sends the case to Operations Lead.
